Summary: AI Engineer with 1.5+ years of remote experience on US-based teams, building production LLM systems: agent platforms, MCP tooling, voice AI, and model fine-tuning. Creator of **NotebookLLM** (10K+ PyPI downloads). I ship end-to-end — architecture, evaluation, deployment, and cost control.

Technical Skills

LLM & Agents: LangGraph, MCP (Model Context Protocol), function calling, RAG, agent memory, prompt engineering, red-teaming

Models & Training: PyTorch, Transformers, LoRA/QLoRA, Unsloth, PEFT, GRPO (TRL), Whisper / Faster-Whisper, ElevenLabs, Gemini

Infra & Deployment: FastAPI, Docker, RunPod serverless, AWS, S3, CI/CD (GitHub Actions), CUDA graph optimization

Languages & Data: Python, TypeScript, SQL, Bash; pandas, NumPy, Scrapy, Playwright

Work Experience

Teamlift — United States (Remote)

Junior Data Scientist **Jan 2024 - Dec 2024**

- Scraped **thousands of AI tools** from public tool directories, building the structured dataset that powers **Teamo**, Teamlift's recommendation engine.
- Built an automated **verification pipeline** (HTTP status checks, screenshot capture, freshness validation) that kept listings accurate and trustworthy — eliminating stale and duplicate entries at scale.
- Preprocessed and normalized thousands of tool records into model-ready features for the recommendation engine.
- Worked directly with US-based stakeholders remotely, shipping dataset improvements on tight iteration cycles.

Data Science Intern **Jul 2023 - Dec 2023**

- Built an automated pipeline collecting **thousands of job postings** from dice.com with **deduplication** — hardened with retries, rate limits, and robust parsers.
- Extracted skill-demand signals from job descriptions at scale; trained **time-series models** to forecast demand, informing product and market decisions.

Technical Projects

Kausal — Production AI Agent Platform (private) **2026**

- Extended the open-source ii-agent framework in **pure Python** (no LangGraph): custom **RAG** pipeline, layered memory, full **observability** (structured logging, OpenTelemetry tracing, metrics with self-hosted SigNoz), realtime **voice/video via LiveKit**, **LiteLLM** multi-model routing, agent skills, and S3 storage — guarded by a **7,275-test** suite.

NotebookLLM — Open-Source Python Package + MCP Server **2025 - 2026**

- Published a **PyPI** package + MCP server (10K+ downloads) making Jupyter notebooks LLM-efficient: agent-optimized output cuts tokens up to **80%** across 8+ formats, with tiktoken token budgeting, streaming for 10 MB+ notebooks, and Claude Desktop / Cursor / VS Code integration.

Chatterbox-Optimized — Production Text-to-Speech Engine **2025**

- Up to **4.5× faster inference** (RTF 0.59 → 0.13) via bucketed CUDA Graphs, bfloat16, and KV-cache tuning; zero-hallucination pipeline (parallel candidates + **Faster-Whisper** WER validation) deployed to **RunPod serverless**.

Archon 2.0 — Agent Security Platform **2026**

- 8-layer defense pipeline, **222-probe corpus** across 10 attack packs, runtime defense proxy, MCP security scanning, and memory-poisoning targets — full **OWASP Agentic Top-10 (ASI01–ASI10)** coverage; **2,295 tests** at a 93% coverage gate. Predecessor ranked **13th/100+ overall** (49.7% avg; 85.1% defense / 14.4% attack) in Berkeley's AgentBeats Arena.

Archon 1.0 — AgentBeats Security Arena (Competition) **2026**

- Scenario-agnostic attacker/defender agents (A2A protocol + Google ADK): ranked **13th/100+ overall (49.7%), 6th Defense (Blue, 85.1%), 18th Attack (14.4%)** on the private on the private leaderboard — generalizing to unseen scenarios by design; hardened by 286 tests.

Cerberus — Stealth Browser Infrastructure for AI Agents **2026**

- Self-hostable control plane pairing a stealth Chromium build with token-efficient orchestration: a **60-tool MCP bridge**, multi-agent isolation gateway with worker leases, and **86 automated verification checks** across twelve verified build phases.

Forge — The API Compiler for the Agentic Era **2024 - 2026**

- One OpenAPI 3.x spec in, production artifacts out: SDKs in **10 languages**, CLIs, MCP servers, Agent Skills, Terraform providers — **17 output types** with TypeScript SDKs compiling strict on Stripe (3K files) and Cloudflare (14K files) real specs.

Education

B.Sc. Software Engineering, National University of Modern Languages (NUML), Islamabad **Aug 2026**

Certifications

Datasets Expert · Notebooks Expert (13 medals; Datasets rank 731/11,277, best #109), Kaggle **2024 - 2026**

Associate Data Scientist in Python · Data Analyst with Python (Career Tracks), DataCamp **2025 - 2026**

Generative AI Fundamentals · Intro to LLMs · Intro to Generative AI · Intro to Responsible AI, Google Cloud Skill Badges **2023**

Python · Intro to Programming (Professional Certificates), Kaggle Learn **2025**

Advanced LLM Bootcamp, NUST & Sky Electric **2024**

Claude Certified Developer – Foundations (proctored exam), Anthropic **2026**

Aspire Leaders Program — Cohort 4 2026, Aspire Institute (founded at Harvard) **2026 (expected)**

in progress **McKinsey.org Forward Program — Core Skills**, McKinsey.org **2026 (expected)**

in progress
