Summary: Python backend engineer with 1.5+ years of remote experience on US-based teams, building API and agent-serving infrastructure: **FastAPI** services, WebSocket servers, serverless GPU workers, MCP/HTTP control planes, async PostgreSQL, and S3 storage. Author of two published **PyPI** packages (10K+ downloads).

Technical Skills

APIs & Services: FastAPI, WebSocket, REST design, MCP servers, HTTP control planes, token authentication, async request handling

Data & Storage: PostgreSQL (asyncpg), Alembic migrations, Redis, S3, ETL pipelines, caching

Async & Systems: asyncio, thread pools, lazy resource management, subprocess isolation, streaming (ijson), multiprocessing

Infra & Deployment: Docker (multi-stage, CUDA images), docker-compose, RunPod serverless, CI/CD (GitHub Actions), Make, Linux

Languages: Python, TypeScript, SQL, Bash

Work Experience

Teamlift — United States (Remote)

Junior Data Scientist **Jan 2024 - Dec 2024**

- Scraped **thousands of AI tools** from public tool directories; built an automated **verification pipeline** (HTTP status checks, screenshot capture, freshness validation) feeding Teamlift's **Teamo** recommendation engine.
- Preprocessed and normalized thousands of tool records into model-ready features via reproducible ingestion workflows.

Data Science Intern **Jul 2023 - Dec 2023**

- Engineered an automated ingestion service collecting **thousands of job postings** from dice.com with **deduplication**, delivering clean, queryable datasets.
- Trained **time-series models** to forecast skill demand extracted from job descriptions.

Technical Projects

Kausal — Production AI Agent Platform (private) **2026**

- Extended the ii-agent framework in **pure Python** (no LangGraph): custom **RAG** pipeline, layered memory, **OpenTelemetry** observability (tracing, metrics, SigNoz), realtime **voice/video via LiveKit**, **LiteLLM** multi-model routing, agent skills, and **S3** storage — backed by PostgreSQL/Redis, Docker microservices, and a **7,275-test** suite.

Chatterbox-Optimized — Serverless TTS API **2025**

- Shipped a production **RunPod serverless** worker (rp_handler + CUDA Dockerfile) for text-to-speech: up to **4.5× faster inference** (RTF 0.13), long-text chunking with stitched audio, Whisper-validated candidate selection, and a locally testable API harness.

Cerberus — Multi-Agent Browser Control Plane **2026**

- Built an HTTP API + dashboard (**127.0.0.1:9867**) with token authentication, a multi-agent isolation gateway with worker leases and routing, parallel instance management, persistent per-profile session storage, and a **60-tool MCP bridge** — verified by 86 automated checks.

NotebookLLM — MCP Server & Async Execution **2025 - 2026**

- Published a **PyPI** package + MCP server (**10K+ downloads**): async Jupyter kernel execution with lazy per-session kernel lifecycle and thread-pool responsiveness, streaming ingestion for 10 MB+ notebooks, and atomic crash-safe writes.

Education

B.Sc. Software Engineering, National University of Modern Languages (NUML), Islamabad **Aug 2026**

Certifications

Certificates: Claude Certified Developer – Foundations (Anthropic, proctored) · Kaggle **2× Expert** (Datasets · Notebooks, 13 medals) · DataCamp DS/DA career tracks · Google Cloud Gen AI badges (4) · NUST Advanced LLM Bootcamp · Leadership: Aspire Leaders Program (Cohort 4 '26, in progress) · McKinsey.org Forward (Core Skills '26, in progress)
